Craig & Davies Fans for Cars, manufacturers in Altona, customises fans for hobby motorist. Factory tour for Club possible.
Coming events on website and click Calendar – click on date for club events to view the next event.
Motorclassica – 25 cars for each club, removing smaller clubs like ours. Very disappointing as the bigger Clubs do not only represent those interested in historic motoring – all the expensive marques always get preserved and the vehicles for the common man / family, get left out and forgotten. One of the original purposes of our Club was to retain and foster the forgotten Morris – write a letter to Motorclassica- for what it is worth.
Challenge for Historical Motoring – special fuel, plant trees, not electric cars. Green energy not feasible as batteries need resources that the planet does not have. Lithium and other metals needed are not plentiful and will run out and prevent batteries from being made for most people.
Little River Community Hall – AOMC Event –discussed this event.
44 members in club on CPS – so doing well.

TREASURER'S REPORT: Apologized for absence.

SECRETARY: No correspondence and no response from VicRoads to our letter seeking VicRoads list of our CPS members.
